Dear Hiring Team,

I am excited to apply for the Accounts Payable Clerk position with the City of Brantford. With hands-on experience in data focused environments combined with a Bachelor of Commerce (Honours) in Management Economics and Finance, I have developed a strong foundation in maintaining financial information and using data to support informed decision-making.

At TD Canada Trust, I processed and reconciled high-volume financial transactions while ensuring accuracy, confidentiality, and compliance with banking regulations and internal procedures. Beyond daily transactions, I regularly reviewed client information, resolved discrepancies and maintained accurate records for reporting and account administration; skills that are directly transferable to tasks like reviewing and processing accounts payable invoices, supporting documentation, and financial records. This experience strengthened my attention to detail and ability to identify and address financial discrepancies while working with sensitive information in a regulated environment.

As an Assistant Manager at Country Kitchen Esso, I managed daily financial operations including reconciling sales transactions, tracking expenses, maintaining financial records, and monitoring operational metrics. I also analyzed sales reports and revenue trends to identify performance insights and support data-driven business decisions highlighting my ability to maintain accurate financial records, review transactions, and support operational reporting. These experiences developed my ability to work collaboratively, communicate effectively, and recognize opportunities for continuous improvement.

Additional to my professional experience, my academic background and independent projects have strengthened my technical accounting and financial-analysis skills. I have developed proficiency in Microsoft Excel, including working with Pivot Tables, SUMIFS, VLOOKUP, and automated reporting tools (Macros). I also exposure to additional financial and data management tools including Power BI, Tableau, RStudio, SQL, Python, SAP, QuickBooks, and ERP systems.

I am motivated to contribute to a collaborative Finance team where accuracy, confidentiality, and efficiency are essential. With my background, technical proficiency, and commitment to everyday discipline, I am confident I would effectively perform Accounts Payable Clerk functions.

Thank you for your time; I welcome discussion of how my skills further align with this position.

Kind regards,

Saif Tabassum

Saif Tabassum
