Dear Hiring Team,

I am excited to apply for the **Data Quality Coordinator** position with **SOAR Community Services**. With hands-on experience in data focused environments combined with a Bachelor of Commerce (Honours) in Management Economics and Finance, I have developed a strong foundation in maintaining reliable information and using data to support informed decision-making.

At TD Canada Trust, I processed and reconciled high-volume financial transactions while ensuring accuracy, confidentiality, and compliance with banking regulations and internal procedures. Beyond daily transactions, I regularly reviewed client information, resolved discrepancies and maintained accurate records for reporting and account admin; skills that are directly transferable to tasks like identifying and resolving data quality issues across client and administrative records. This experience strengthened my attention to detail and ability to identify and address data inconsistencies while working with sensitive information in a regulated environment.

As an Assistant Manager at Country Kitchen Esso, I managed daily financial operations including reconciling sales transactions, tracking expenses, maintaining financial records, and monitoring operational metrics. I also analyzed sales reports and revenue trends to identify performance insights and support data-driven business decisions highlighting my collaboration with leadership to generate service statistics and support strategic planning and reporting. These experiences developed my ability to work collaboratively, communicate effectively, and recognize opportunities for continuous improvement.

Additional to my professional experience, my academic background and independent projects have strengthened my technical data-analysis skills. I have developed proficiency in Microsoft Excel, including working with Pivot Tables, SUMIFS, VLOOKUP, and automated reporting tools (Macros). I also exposure to additional data entry tools including Power BI, Tableau, RStudio, SQL, Python, SAP, QuickBooks, and CRM systems.

I am motivated to contribute to a collaborative administrative team where accuracy, confidentiality, and efficiency are essential. With my background, technical proficiency, and commitment to everyday discipline, I am confident I would effectively perform Data Quality Coordinator functions.

Thank you for your time; I welcome discussion of how my skills further align with this position.

Kind regards,
